Environmental Manager

Driven by the core values in cultural, social, environmental and financial stewardship, Malahat First Nation on Vancouver Island near Victoria, BC has created a new position in environmental management for a talented person to be part of our dynamic multi disciplinary team.

Overall purpose of the job:

Environmental Manager provides leadership in sustainable development, reports on a broad spectrum of issues and examines a wide range of proposals of various economic and sustainability values while determining the impact on the Nation and the environment.

This role will be especially attractive to someone who has the combination of education and experience to propose strategies and actions as you lead development through research, data collection, analysis and policies. It is an ideal role for someone who wants to shape this new position into one that is depended on for making a difference in helping to build stronger organization and one that plays a key role in the growth of a Nation.

Qualifications:

- Bachelor Degree in Ecology, Habitat Management, Environmental Science, or related field
- A minimum 2 years of experience working in BC as an environmental consultant or project manager
- Currently registered or eligible (within 3 months) for professional designation (i.e. RPBio, CAB, BCIA)

Essential Competencies:

Direct working knowledge of government regulations, industry standards and codes of practice, and environmental auditing

Interpret data and reports and use them to create solutions to environmental concerns.

Expert interpersonal communication skills with solid ability to summarize complex information verbally and written for non technical people

Strong public speaking skills with dissemination to variety of people and presenting to Council, in boardrooms, and engagement with small groups, town halls and larger forums.

Extensive experience writing proposals and reports with efficiency and effectiveness.

Essential Attributes:

You are an analyst and a leader. Good judgment, excellent problem solving and sound decision making skills and as such have earned the respect of First Nations, government, and your peers.

Ability to work with a diverse range of confidential and sensitive information. Can manage multiple files, work within tight timeframes and deadlines

Effortlessly crossover from field work and boardroom as you will take part and lead environmental studies and advise on the human impact on the environment.

Possess a track record of success. You are a leader who is a forward thinker, self-motivated, well organized, collaborative and driven in pursuit of exceptional results.

Nice to Have:

Familiarity with LNG terminology, processes and lifecycle impacts. Specialize in one or more environmental fields of study.

Please send your resume with cover letter to: robert.sagmeister@malahatnation.com Applications received by 4pm Friday May 27, 2016 will be considered. We appreciate your interest in this fantastic opportunity; however, only those selected for an interview will be contacted.
